

Recommended Battery Charging Voltages

Listed in volts per cell. Multiply by 24 (48-volt), 12 (24-volt), or 6 (12-volt).

Wet-Cell Batteries (Hawker PV1, L-16, Golf Cart, etc.)		
Bulk 2.45	Float 2.25	Equalize 2.55

Sealed Batteries (both Gel and AGM types)		
Bulk 2.35	Float 2.25	Equalize Do NOT Equalize!

These are generally recommended charging voltages that will work well for most batteries throughout their life. Rules are made so we can have exceptions. If your battery came with specific instructions, please follow the manufacturer's recommendations.
